Mixed Media Portrait

Charcoal on Bristol
Paper. 19" x 25".

This piece was assigned to be a portrait with elements that represent me as a person. I placed myself into a detail of Lady Gaga’s “ARTPOP” album cover (designed by Jeff Koons), because I connect with the singer/artist in many aspects of life.

Observation Portrait. Charcoal on Bristol paper. 18" x 24”.

This portrait of a friend was assigned to be done by live observation.

2020 INTERIOR DESIGN FIRST-YEAR REVIEW
WHAT IS A SKETCHNOTE?

Sketchnotes are created in real time as you listen to a presentation.

EXpress your emotions. Don't be neutral.

To draw people begin with a circle.

New add a star shape for the body.

INCLUDE your thoughts.

You only need these 5 shapes to sketch anything.

IDEAS, not ART. 

Do you love or hate it?

Capture the BIG IDEAS instead of the details.

You CAN do this!

It's a visual map of meaningful thoughts and ideas.

4 Use arrows to link ideas.

Tip: 

1. Use different lettering types to add emphasis.

2. Start by writing the speaker's name and a title before seminar begins.

3. Listen for a theme the speaker uses.
To follow my concept of the sky and embrace the theme of temples at burning man and radical inclusion, I decided to build a model of a temple observatory. Observatories are places of independence, beauty, and bring feelings of peace, relaxation, and harmony with the earth. I thought this was perfect as burning man and temples are a sort of get away where one can feel these same emotions.
Research on Utah's Teen Suicide Epidemic

The problem: from 1999 to 2014, rates of suicide, age 15 to 24, in Utah, the northernmost state in the U.S., the highest. The state is actually one of the largest in terms of population, but the rate of suicide is much higher than the national average.

What they found: They found that there was not just one reason for the rise in suicide rates but many factors, including mental health issues, access to firearms, and social isolation. Mental health issues are a significant contributor to suicide rates, with depression, anxiety, and substance abuse all being major risk factors. Access to firearms, particularly handguns, is another significant factor, as it is the most common method of suicide.

What the CDC recommended: how to help.

- Increase access to evidence-based screening and treatment for youth mental health issues
- Increase availability of mental health services in schools and community centers
- Increase community awareness and reduce stigma associated with mental health
- Implement comprehensive suicide prevention programs that include education and access to mental health resources
